Software Developer I

Are you looking to make an immediate impact in a fun and challenging workplace? Are you a go-getter that wants to be rewarded based on the results of your work? Do you enjoy working with the latest technology and learning new things? Would you rather be a valued contributor in a smaller company than be under-appreciated in a larger company? Do you enjoy working with a wide range of customers and projects? If you answered YES to all the above, The Northlake Partners might be an ideal fit for you.

Role Summary

The task of our development team is to code new features, fix bugs, create reports, and keep our technology platform current. The Software Developer I will work on issues as assigned but this is not a “heads-down” coding position. You will also work directly with our implementation team and system analysts to determine the best way to solve issues. We expect our development team to take an active role in problem solving so there are times you may interact directly our customers.

Duties & Responsibilities

Primary Items – (Approx. 70% of your time)

- Full Stack Development including both front end and back end.
- Work within Visual Studio, SQL Server, C#, ASP.Net, JavaScript and TSQL.
- Ensure your development items are completed on-time and on-budget.
- Work directly with project leads on designing features for customer driven projects.
- Participate in designing new software features and framework improvements.

Other Items – (Approx. 30% of your time)

- Work with Support to quickly solve and deploy patches for any serious software bugs found.
- Ensure any patches that are installed are checked-in so they can be included in a future release.

Required Experience & Skills you must have

- 2 to 4 years of work experience with the Visual Studio environment, C# and ASP.Net.
- 2 to 4 years of work experience with SQL Server or equivalent database.
- AA or BA/BS in MIS, Computer Science, or equivalent combination of education + experience
- Excellent analytical skills coupled with a high level of initiative and responsibility.
- Strong interpersonal skills and demonstrated effectiveness working in a team environment
- Ability to conform to shifting priorities, demands and timelines.

Other Nice to Have Skills

- Experience with transactional business software (QuickBooks, Dynamics GP, SAP, etc.).
- Experience with Telerik controls.
- Experience with Jira.
- Enjoy working in a dynamic multi-disciplinary team environment.

About The Northlake Partners

Located in Redmond, The Northlake Partners provides ERP software and consulting services throughout the USA, UK, Canada, and South America. We implement Microsoft Dynamics GP® and NorthScope™, our web based suite of modules for sales, distribution, inventory, purchasing, business analysis and more. We work across a wide variety of businesses, mostly in manufacturing environments. Our application is an extensive web platform that includes over 250 pages within 11 modules. We encourage you to reference our websites for more detail: GoNorthScope.com and TheNLP.com.

Corporate Culture

We value exceptional customer service, strong integrity, and hard work. We offer a fun and challenging workplace with support, encouragement and opportunities for training, development and advancement. We all get along and everyone is valued. We take pride in what we do, we work hard, and we have fun. We look for go-getters who share these values and want to contribute to a dynamic team.

Outstanding Benefits

In addition to competitive compensation, we offer the following benefits:

- Paid medical, dental, and vision
- Paid short-term & long-term disability
- Paid Time Off and Holidays
- 401(k) Plan with an employer match
- Free food & drinks
- Professional growth opportunities
